Abstract (en)
[origin: WO8803399A1] In order to produce a much simpler and in particular lighter-weight wheel-chair than existing models, and to achieve at the same time optimum rigidity and safety, the surface of the seat (3), back support (1) and side-walls (5) are designed as a self-supporting monocoque construction, in (self-)reinforced and/or foam plastic. The base (25) carried by the wheels (17, 37) also consists of (self-)reinforced and/or foam plastic.
