Abstract (en)

[origin: EP0325051A2] A suspended floor comprises a plurality of supports (1) to engage and support floor tiles (12). Each support (1) has a support positioned above an underlying surface. The support plate (8) has four upwardly directed lugs (9). On the exterior of the side walls (15) of the tiles (12) are brackets (23) or protrusions forming faces which face (24) away from the corners of the tile (12) and which engage the lugs (9).
