Abstract (en)

[origin: EP0325920A1] The invention relates to a fast-extinguishing or self-extinguishing cigarette, the tobacco rod of which is surrounded by a wrapper of cigarette paper which has regions of lower and higher permeability to air, in the form of zones designed in a pattern, and which is characterised in that the cigarette paper has been adjusted, by single or repeated water-marking of the respective patterned zones, from an initial air permeability of less than 15 P (according to DIN ISO 2965) to a mean overall air permeability of below 4 P.
