Abstract (en)
[origin: EP0326139A2] A method for manufacturing self-adhesive labels, having a label sheet coated on its back with adhesive and having an adhesive-repellent carrier sheet, the action of the adhesive on the label sheet being locally cancelled by means of an agent. In order to be able selectively to adjust the effect of the adhesive force, provision is made for the agent to be given the shape of a fine pattern of lines or dots to cancel the effect of the adhesive, at least in a part-area of the label. <IMAGE>
