Abstract (en)  
[origin: EP0326772A1] A relay (10) comprises a modular insulating box (14) enclosing a processing circuit intended to receive a measurement signal issuing from a sensor placed outside the box (14). The box (14) comprises two female connectors (24, 26) engaging through a plug-in fit with a conjugate male connector (22) of the sensor. The sensor can be mounted by choice on the side or to the rear of the relay (10). <IMAGE>
