Abstract (en)
[origin: EP0327768A2] A reflection-photographic element having a light-sensitive silver halide photographic emulsion layer coated on at least one side of a support that is made of a white polyester film having no more than 20% transmittance for all visible light and which contains titanium dioxide particles having an average size of 0.1 - 0.5 μm ; at least the side of said support which is coated with said emulsion layer has a center-plane-average roughness of no more than 0.12 μm and said side is substantially free of projections that are at least 1.0 μm high as measured from the center plane; and a process of preparation thereof.
