Abstract (en)
[origin: EP0329050A1] Microelectronic circuit comprising a microwave case (10) with at least one incorporated microelectronic substrate (17, 18, 19, 10), this case being provided with a longitudinal cavity (11) in which each substrate (17, 18, 19, 20) is arranged. This case (10) is provided with at least one pair of lateral housings (15, 16) machined on either side of the cavity (11). A removable metal partition (14) is arranged above the corresponding substrate between these two housings (15, 16) in order to be able to partially obstruct the said cavity (11). Application to the field of microwave frequencies. <IMAGE>
