Abstract (en)
A tip-up seat includes a frame (100) comprising a first section (101) pivotally supporting a seat portion (138), a second section supporting a backrest portion (133), and stop (144,146) for limiting the pivotal movement of the seat portion from its tip-up position to an operative substantially horizontal position. The stop comprises a surface of the second section of which engages a part of the seat portion. The first section includes spaced apart arms (102) adjacent opposite edges of the seat portion for pivotally supporting the seat. The frame, seat portion and backrest portions may comprise hollow mouldings which fit together by means of spigotal connections.
