Abstract (en)

The invention relates to a container (1) used for transporting goods, with no triangulation elements between its front walls and the structures of its roof and its chassis, respectively. It is characterised in that the means for guidance in rotation consist of torsion bars (8). Application to the construction of containers for transport, in particular railway transport. <IMAGE>

Abstract (fr)

L'invention se rapport à un contenant (1) utilisé pour le transport de marchandises, dépourvu d'éléments de triangulation entre ses parois frontales et les structures respectivement de sa toiture et de son chassis. Il est caractérisé en ce que les moyens de guidage en rotation consistent en des barres de torsion (8). Application à l'industrie de la construction de contenant pour le transport notamment ferroviaire.
