Abstract (en)
[origin: EP0329578A1] This toilet seat (1) comprises a seat (3) and a cover (4), articulated on a base (6) fixed to the rear part of the pan (2). The seat (3) and the cover (4) are articulated with each other by a hinge (5), and a fast fixing device (8, 19) is provided to connect the seat-cover assembly (3, 4) to the fixed base (6), or to unlock this assembly in order to allow its withdrawal, without separating the seat (3) from the cover (4). The removal and the refitting operations, particularly for cleaning purposes, are thus facilitated. <IMAGE>
