Abstract (en)

[origin: EP0329623A2] The invention concerns a table with a top in one or more parts and provided with fitted support legs, each leg (12) having at least one lateral brace (14) connected to the leg itself by means of a hinge line (15) obtained at the moment of moulding the leg, the said brace being movable from a position of substantial alignment with a side of the leg to a position of separation in which it is fixed to a side or rib (13) previously disposed on the lower surface of the table top. <IMAGE>
