Abstract (en)

[origin: EP0329829A2] The device 100 serves for applying very small amounts of a glue or a similar product to the surface of a web-shaped substrate 1 passing by below the device 100. The application occurs by means of a plurality of slot nozzles 35 which are arranged next to one another, but separated from one another, and are supplied by a separate glue pump in each case. <IMAGE>
