Abstract (en)

[origin: EP0329883A1] The container (10) includes a body (11) and a neck (12), wall (14) and dispensing spout (16) extending upwardly from a body opening. The dispensing spout has a diameter equal to or greater than the diameter of the neck. The wall surrounds the dispensing spout which extends above the top of the wall. A web (13) joins the wall and the dispensing spout to form a drain channel (30). A drain opening (18) through the spout is defined adjacent the channel for draining fluid from the channel into the container body. A cap (20) having a depending skirt (22) defining threads (23) mates with threads (15) on the container wall to close the container.
