Abstract (en)

[origin: EP0329987A2] Instead of a back seat, a guide track (1) is arranged in a motor vehicle, in the longitudinal direction of the motor vehicle, in which guide track a trolley (3) is movably arranged. The trolley (3) is able to pivot out of a horizontal position into an approximately vertical position when it has reached the forwardmost position of the guide track (1). Arranged on the trolley is a carriage (7) which serves to pull up a wheelchair (46). If the carriage (7) is in the uppermost position, it pivots into its horizontal position and then moves backwards with the wheelchair, within the guide track (1). <IMAGE>
