Abstract (en)
[origin: EP0330530A1] Precompression pump in which the precompression is basically the result of the radial deformation of part of the body (2) which has at least one side wall (2b) whose principal cross-section is non-circular, for example polygonal. <??>Such miniaturised pumps, which possess a particularly simple structure, may be employed on devices such as sprays for perfumes, insecticides and drugs. <IMAGE>
