Abstract (en)

[origin: US4901882A] The invention relates to cases, in particular cases for packaging cosmetic products, provided with a closure device including a movable element comprising a tilting pushbutton (5) in the form of a T, the top beam of which includes a control bar (51) projecting from the front edge (1') of the lid (1) in the closure position, and on the back a pivot (53, 53'), and the central leg of which comprises a latching prong (58) provided with a hook member (59). The movable element cooperates with fixed elements (6) of the lid including a front cradle (64), at least one tongue (65), and a window (61) and fixed elements of the base (2) including a recess (74) for the latching prong (58) and a retention member (73) that is complementary with the hook member (59) of the prong (58).
