Abstract (en)  
[origin: EP0330953A2] The fastening tool possesses a barrel (2) with a laterally projecting guide box (4) for receiving a spring-loaded nail strip (11). The guide box (4) communicates with a barrel bore (2a) via an inlet opening (2b). Located diametrically opposite the inlet opening (2b) with respect to the barrel bore (2a) is a loading opening (2c) which permits the insertion of a nail strip (11) into the fastening tool. A stop (7a), which supports the nail strip (11) in the feed direction, can be moved into the projection of the loading opening (2c). <IMAGE>
