Abstract (en)

[origin: EP0331084A2] A through type connector consisting of a synthetic plastic block into which are molded one or more terminals connected, at one end, to respective electric wires and, at the other, to respective blade type contacts; and a lock coupling bayonet-connected in projecting manner to one end of the block fitted through a hole in the partition through which the connector is fitted; the wires and blade type contacts projecting in fluidtight manner from opposite ends of the block, and the contacts being housed inside the lock coupling when this is connected to the block.
