Abstract (en)

A modular kitchen comprises a set of units (2, 3) and electric household appliances (4, 5, 7, 8, 9) which are integrated with each other so as to form a matching furnishing assembly. The kitchen further includes: a central panel (10) for controlling the electric household appliances, which has a single connection (11) to the electricity supply system and a plurality of supply cables (4b, 5b, 7b, 8b, 9b) connecting the panel (10) to the various electric household appliances (4, 5, 7, 8, 9), a common automatic safety switch (15) integral with the control panel (10) and interposed in the connection (11) between the supply system and the electric household appliances, a plurality of auxiliary automatic switches (16, 17, 18, 19, 20) interposed in the connection between the common automatic switch (15) and the individual electric household appliances, the auxiliary automatic switches also being integral with the control panel (10), and a plurality of guide ducts (13) for the cables (4b, 5b, 7b, 8b, 9b) connecting the electric household appliances to the control panel, fitted into the rear wall of the assembly.
