Abstract (en)
[origin: EP0331972A1] The folding container has a bottom (2) and four side walls (3, 4, 5, 6) which can be connected to one another by in each case two foldably arranged gusset portions, a tab (12) being moulded on to in each case one of the gusset portions (7, 8). When the side walls have been folded upright, the tab lies on the outside of the one side wall and is fixed there. This fixing is effected particularly favourably by cutting lines (15, 16) in the side wall, in which cutting lines the tab engages and is hooked. <IMAGE>
