Abstract (en)

[origin: EP0333040A2] In order to clean the outside of a spraying device (2) in the region of the spraying nozzle and, if present, air nozzles, the respective part of the spraying device (2) is inserted through an opening (4) into a container in which all the points to be cleaned are impacted directly with the cleaning liquid from a nozzle arrangement (6) which is moved around the part to be cleaned in an arcuate shape. The invention is particularly suitable for the fully automatic cleaning of the spray pistol guided by a paint-spraying robot. <IMAGE>
