Abstract (en)

Heating container of liquids,fatty products,gels and si,ilar provided with an independent or fixed heating electrical system, according to model and comprising an upper container and insulating tank (5) of the product to be heated, equipped or not with a metering pump (24), according to use, which is seated on the part containing the control and heating electrical system provided with a system allowing its vertical or horizontal positioning. Said tank at the lower part (10) is incorporating a suitably profiled part to receive by contact, through its external side, the heat coming from the resistor of the active part whereon is resting and the heat is transmitted through its upper side to inside the tank or passive part, in the case of the non-independent and fixed model, all the parts making up a single block.
