Abstract (en)

[origin: EP0333293A1] A window or door frame assembly comprising a plastic frame including jambs, a head, fastening means, and synthetic plastics weather-proofing means. This assembly is characterized in that, besides the plastic frame (25), the means (1,10,8) belonging to the frame assembly, are all made substantially of a synthetic plastics material; and that the fastening means can be anchored directly in the wall leaf. The fastening means and the plastic frame (25) are provided with coating coupling members (5) and counter coupling members (16) with which the plastic frame (25) can be coupled directly to the fastening means (1).
