Abstract (en)
[origin: EP0333470A2] An autotransfusion device usable with a chest drainage unit includes a collapsible fluid collection bag assembly (16) having a pliable fluid collection bag (64), a pair of stiffener members (76, 78) adjacent the opposed sides of the bag, and an enclosure (80) sealingly connected to the bag securing the stiffeners in place. A fluid inlet (22), gas outlet (30), and a blood outlet (73) are connected to the bag. A holder (18) is dimensioned to compress the opposed edges of the bag assembly to cause the stiffeners to bow outwardly in opposite directions and expand the collection bag.
