Abstract (en)
[origin: WO8803077A1] Protective cover (30) for abrasive disks, with matching fixing recess (14) comprising a cylindrical fixing shoulder (17) for the support portion (31) of the cover (30). This support portion (31) has at least one projecting locking element (35), to which corresponds an appropriately dimensioned opening (19, 20) in the fixing shoulder (17) and in which can be inserted the locking element (35) during fixing of the support portion (31). The shape and/or arrangement and/or number and/or dimension of the locking element (35) and of the opening (19, 20) are selected according to the dimension of the cover, determined by the rated rotation speed of the grinder and vary according to the different dimensions of the cover.
