Abstract (en)

The present invention relates to a container (1) for loose products in general, provided with raising means, adapted to be stored either in a horizontal or in a vertical position, comprising a holding body (2) of elongated parallelepipedal shape, made of a high strength fabric and provided, on its opposite bases, with respectively a discharging outlet (4) and a loading inlet (3). At one of the bases, there are provided strips (10) for vertically raising the container whereas, at the middle region of the side surface, there are provided holding straps (11) which are arranged at ring members (12), which straps can be used for raising horizontally the container.
