Abstract (en)
[origin: EP0334196A2] The invention relates to a device for displaying products which consists of a front semi-transparent mirror (2), a rear mirror (3) and at least one source of light arranged between said mirrors, the mirrors being metal-coated on their sides facing away from each other. A particularly advantageous development of the invention consists in that at least one of the two mirrors is adjustable in respect of its angular position relative to the other mirror. <IMAGE>
