Abstract (en)
A bracelet or necklace having an end ring (7) at one end thereof and fastening means (9) which are engageable with the end ring (7). The end ring is rotatable about an axis which extends lengthwise of the bracelet or necklace so that the ring is readily moved into an attitude suitable for effecting fastening. The bracelet or necklace may comprise a series of gate sections (1) hinged together. The fastening means may be a padlock (9), in which case a rotatable end ring (7) is provided at each end of the bracelet and both end rings are engaged by the padlock. Alternatively, a bolt ring may serve as the fastening means.
