Abstract (en)

[origin: EP0334805A2] The invention relates to a water-tight light door for closeable shiprooms, which light door is to be opened to one side and, on account of its weight, can also be used in smaller ships and yachts while providing reliable bulkheading. To this end, provision is made for the door leaf to have a specially designed encircling seal which is expanded by means of a pressure medium and can thus be applied in a sealing manner.
