Abstract (en)
[origin: JPH0270199A] PURPOSE: To eliminate the need for special housing to integrally fix two housing halves by providing two removable stationary member to fix split housing halves as an audio input connection part. CONSTITUTION: Two housing halves 1, 2 are integrated by using fixing members such as screws 3-5. In this case, the screws 3, 4 are used for audio input electric connection parts. The screw 3 (the screw 4 is configured identically) is connected to a metallic female screw bolt 9. One terminal of the boil 6 is molded to the lower housing 2, a thread hole to which the screw 3 is threaded is made to the other end. Thus, the upper housing 1 is fixed to the lower housing 2 by tightening the screw 3. Moreover, the audio input connection part is in electric contact with the bolt 6. The bolt 6 is conductive to connect electrically the metallic screws and each electric component.
