Abstract (en)

[origin: WO8804527A1] A fermentative procedure for preserving protein feed with the aid of lactic acid producing bacteria in the presence of carbohydrates so that fermentation starts and takes place fast and more efficiently and more reliably than before; according to the invention to protein containing feed material are added gluconodelta-lactone and carbohydrate-cleaving enzyme.

Abstract (fr)

Le procédé de fermentation décrit sert à conserver des aliments contenant des protéines à l'aide de bactéries produisant de l'acide lactique en présence d'hydrates de carbone, de sorte que la fermentation commence et se produit rapidement et de façon plus efficace et plus sûr qu'auparavant. Selon la présente invention, la substance alimentaire contenant des protéines est additionnée de gluconodelta-lactone et d'une enzyme de clivage des hydrates de carbone.
