Abstract (en)

[origin: EP0336098A2] A device for uniforming the distribution weight per unit area of single- or multi-layered mats for the manufacture of particle, fibre or suchlike boards is described, in which a mat support, which is charged via at least one scattering head is assigned a brush-back unit extending over the width of the mat, and ahead of this brush-back unit is arranged a distributing unit, located in the mat particle throwback scattering path, for deflecting impinging mat particles. <IMAGE>
