Abstract (en)
[origin: EP0336131A2] A mobile fence element (10) based on a lattice element (12), in particular an expanded-metal element, is proposed in order to be able to erect a fence rapidly, for example in the context of a police operation. The lattice element (12) is provided with a supporting leg (24). This supporting leg (24) is pivotable between a supporting position and a folded position.
