Abstract (en)

[origin: EP0336204A1] Goalkeeper's gloves have hitherto had a part for the palm of the hand made of latex and a part 14 for the back of the hand, which parts are connected to one another by connection parts, namely pieces between the fingers and side parts. In order to achieve optimum adherence of the ball on the glove, the part for the palm of the hand and at least one connection part consist of latex, said parts preferably forming a planar flat blank 22 or a shaped part. <IMAGE>
