Abstract (en)  
[origin: EP0336805A1] Pressure-sensitive electrical switch of the type comprising a contact module (100) provided with at least one moving electrical contact (150) and a control module (200) actuated by a fluid under pressure and provided with a return member which regulates the displacements of the moving contact. According to the invention, the moving contact is formed of an elastic strip (150) made of an electrically conducting material which also constitutes the return member of the control module (200). <IMAGE>
