Abstract (en)  
[origin: EP0336842A1] Process for the manufacture of a paper pulp for fiduciary use from a raw material consisting of textile fibres is characterised in that the operations of laundering, bleaching, shredding, unstringing, cutting and washing of the textile fibres are carried out in at least one processing machine (10, 40) of the type with two screws rotating together, in a number of stages following each other continuously. To this end the operations comprise a stage of feeding and mixing the raw material and water, at least one compression stage, at least one stage of shearing the textile fibres, at least one processing stage with the introduction of the laundering and bleaching reactants, at least one stage of washing of the bleached pulp with introduction of the washing water, and a stage of transfer and removal of the bleached and washed pulp. <IMAGE>
