Abstract (en)

The present invention relates to an inner plug of a synthetic resin container for dried powders integrally molded of a thermoplastic synthetic resin which is composed of a planar circular top board (1) and a cylindrical circumferential wall (2) extending downward from the peripheral rim of said top board (1). The top board (1) is formed in a concave shape bulged downward, with an aperture (3), for letting out the contents of the container, located in proximity to the peripheral rim of the top board (1).
