Abstract (en)
A fastening assembly for blind fastening wall panels (2), in a detachable manner, to a rearward supporting structure of partitions or wainscoting. The fastening set comprises channel sections (7) forming part of uprights (1) of the rearward supporting structure. At least one side wall (9) of each channel section (7) has an inwardly extending edge (10), as well as connecting elements (11, 19, 23) attachable along upright side edges (2 min) of panels (2) and provided with hook-shaped lips (3) extending from the rear of panels (2). The set also comprises locking elements (4) movable in the channel sections (7) and adapted to coact with hook-shaped lips (3) extending into the upright channel section (7) for clamping the panel edge zones against the channel sections (7).
