Abstract (en)

Cycles of keep-alive voltages are applied to the addressing-keep- alive electrodes (Yae)_i and to the keep-alive electrodes (Ye) and write pulses (Ii) are applied to the control electrodes (Xj) during the intervals (Ti) when the keep-alive voltages are of opposite polarity, and deletion pulses (Ie) are applied to the control electrodes during the intervals (Te) when the said voltages have the same polarity. Application to display screens. <IMAGE>
