Abstract (en)

[origin: EP0337844A1] Packaging for several foodstuffs isolated from each other in a single overall package. According to the invention, the different food preparations or products are placed in flexible envelopes (12, 13, 14), the said envelopes are vacuum-sealed before submitting the foodstuffs to at least part of their preparation (cooking and/or sterilisation), then flexible envelopes containing different products are inserted in a single rigid overall package (16), preferably metallic, and this overall package is closed while preferably substantially eliminating all traces of oxygen. The invention allows the rapid reconstitution of cooked meals having high level organoleptic and gastronomic qualities. <IMAGE>
