Abstract (en)

[origin: WO8902835A1] In a process for transferring motifs applied by dye to one motif carrier on to another carrier, in particular textiles which can be washed at temperatures up to 95C, the motif side of the motif carrier is brought into contact with the other carrier. Transfer is effected by means of transfer fluid and under pressure. The motifs are produced from a laundry-fast dye or from a dye which is rendered laundry-fast by admixture with an additive during transfer.
