Abstract (en)

[origin: EP0338281A1] The method and device are intended for opening the closure flaps of a carton or for spreading or folding open, in a manner which is suitable for packing purposes, the closure flaps of folding boxes which are already closed at the bottom. <??>The invention essentially comprises lowering the folding boxes (7), whose bottom (12) points upwards and whose closure flaps (8, 9) hang downwards, from a suspended position and placing said boxes on take- along means moving away from each other and in the opening direction. <IMAGE>
