Abstract (en)

Method for cleaning in a liquid medium (A), which makes use of a floatable tool (E) capable of cutting out, collecting and transporting a part (B1) of the product to be cleaned (B) from the working location to a predetermined base and of depositing it at this base, characterised in that said tool is self-driven in a liquid medium and on a solid support, and in that its floatability is ensured by at least two floats. <IMAGE>
