Abstract (en)
A roller shutter lateral slide for a door, window or similar is inserted in the frame (13) of the latter and comprises means (20) allowing its position to be adjusted with respect to the said frame (13) in a direction perpendicular to the plane of the door, window or similar, these means (20) being constituted, more precisely, by fixing means of variable length (21) connecting the lateral slide (10) to the upright (12) of the frame (13). <IMAGE>
