Abstract (en)

The structure has three frames (1, 2, 3) hinged together by pairs of bars (4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b). It also has a cover (cloth or tarpaulin) whose central portion can slide on the ridge beam (12) of the structure carried by the central frame (1) thus permitting folding and unfolding of the structure together with its roof. <IMAGE>
