Abstract (en)
A lubricant comprising an oil-in-water emulsion having a viscosity of at least 68 mm²/sec. measured on a Brookfield Viscometer with a No. 1 spindle at 25 rpm and 25 DEG C and comprising: (i) a continuous phase of a substantially oil-free, aqueous, emulsion-free composition comprising a major amount by weight of water, a minor amount by weight of a substantially water-insoluble oil-soluble EP agent stably dispersed therein, and a minor amount by weight of at least one substantially water-soluble liquid organic dispersing agent which is capable of dissolving the EP agent and of stably dispersing the EP agent in the aqueous composition; and (ii) a discontinuous dispersed phase of an oil. h
