Abstract (en)  
[origin: EP0340602A1] The drive (28) is intended in particular for retrofitting to existing vices (5). In this case, it is provided that the screw spindle (1) be situated substantially on one side of an abutment (6), while a power amplifier (2) be arranged on the other side of the abutment (6). There is provided a sleeve (11) which is supported on the abutment and whose bore (12) is penetrated by an extension (13) of the screw spindle, via which the power amplifier (2) acts on the screw spindle (1). <IMAGE>
