Abstract (en)
[origin: EP0340745A1] For feeding a fuel additive into the fuel tank of a motor vehicle the pump device is formed by a pneumatically actuated displacement pump (14) the movable pump element (18) of which can be adjustably pressure controlled by way of a control valve (44) against the force of a preloaded spring (20), the control valve (44) being preferably actuated directly by the fuel tank cap (56). <IMAGE>
