Abstract (en)

[origin: EP0341087A2] The mounting, framing and display device comprises a mounting board 10 and a cover member 20. The mounting board 10 is a double skin laminated foam filled mounting board incorporating aluminium foil or fibre glass skins on both sides of the foam material. The cover member 20 is formed of an acrylic or similar plastics material, preferably a non-glare grade material. The mounting board 10 is provided with edges 12 formed at an angle of forty five degrees or any chosen angle and the cover member 20 has tongues 22 of a corresponding angle so that the mounting board 10 and cover member 20 may be secured together. The matter to be displayed, e.g. poster, photograph, notice, etc. is sandwiched between the mounting board 10 and the cover member 20.
