Abstract (en)

[origin: EP0341400A2] The invention relates to a labelling station of a labelling machine for containers. To serve the purpose of a compact, user-friendly construction, the housing 13 of the support 6 which bears transfer elements is provided exclusively at the external edge of the support 6 in the machine frame 14, whereas the coupling 26, 27 is arranged between the support 6 and the central drive shaft 30 in the central free space between the mechanisms or drives 16 to 20 and above the mutually engaging mechanism elements 17 to 21 and the table 11 of the support 6. The central drive shaft 30 has been extended as far as the top of the table 11 and, together with the adjacent part 35 of the table 11, carries adjusting markings 37, 38. <IMAGE>
